

MXA70 integrated audio system

- The new MXA70 features a compact yet fully functional 50 watt stereo amplifier and a pair of luxurious, high gloss 2-way speakers that achieve an unusually rich and full sized level of performance for their size.
- For those times when you want to enjoy your music even more intimately, the MXA70 includes a dedicated headphone amplifier that takes advantage of unique McIntosh technologies to yield the best possible personal listening experience.
- The headphone amplifier employs a new adaptation of McIntosh Autoformer technology to produce three headphone impedance ranges so every headphone will receive the optimal McIntosh sound.
- Also features our new Headphone Crossfeed Director (HXD) to allow high quality recordings to image like conventional speakers in your headphones, along with 5 Step Bass Boost Control for further customization.

Flexible Personal Listening
