2025 | Jeep Wagoneer S Audio System by McIntosh

MADE OF SOUND

Rooted in Innovation

For 75 years, McIntosh has redefined the art of delivering music as the artist intended, pushing the boundaries of what's possible from an uncompromising audio system.

Experience crisp high-quality sound reproduction with the lowest possible distortion. A consistent best-in-class listening experience that makes each passenger feel like they're in the heart of the performance. We want you to do more than just hear the music, we want you to live it, experience it, and make every drive a trip that takes sound to new spaces.

Made of Sound

Using the most advanced materials and technologies, our engineers have perfected the art of remarkable sonic reproduction. Designed to expand the expectations of music mobility. Take sound on the road and out-of-doors. Provide a uniquely immersive experience with every seat its own symphonic sweet spot.

McIntosh is more than just music—it's the feeling of being there.

Two American Icons One Cutting-edge Collaboration

Jeep is a legendary brand of passion and principle, making them an ideal partner to take McIntosh's legendary sound on the road again with the all-new Jeep Wagoneer S. Equipped with the McIntosh MX1200, a world-class audio system that pushes the limits of what's possible in an automobile, the result is an advantage you can only get when two American icons put passion and precision on the road.

Legendary Auto Performance Meets Authentic Sound

Jeep and McIntosh shared a vision—to integrate the same level of authenticity and design language from McIntosh uncompromising home audio systems into the brand's first global battery-electric vehicle (BEV).

Optimized for sonic performance, the meticulously crafted cabin of the Wagoneer S is enhanced with ambient McIntosh blue lighting, signature blue meters, illuminated logos, and tactile controls—all crafted to deliver a world-acclaimed listening experience and immersive audio at its best.

An Electric Entertainment Experience

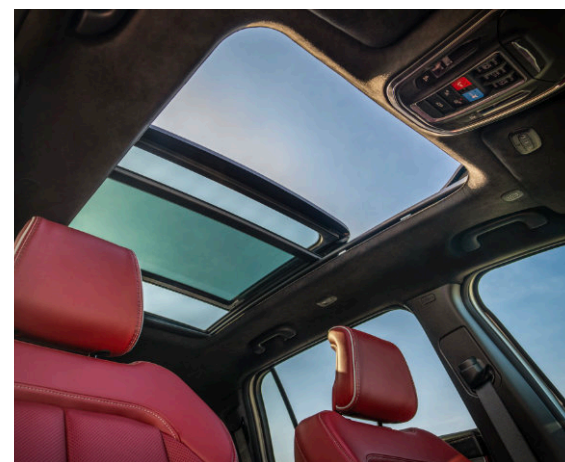

Experience the uniquely immersive experience of the ultimate mobile soundstage in the all-new, fully-electric Jeep Wagoneer S. The quiet of the EV cabin lacks the noise of an internal combustion engine, creating the perfect environment to produce the clarity, balance, and performance that truly moves people like only McIntosh sound can.

Included in the Wagoneer S, the McIntosh MX1200 promises the highest quality listening experience paired with high-end, McIntosh-inspired aesthetics.

From patented technology that eliminates unpleasant, harmful “clipping” and produces pristine sound at any volume to illuminated logos on the door’s speaker grille, aluminum framing, industrial ridged control knobs, and the iconic “McIntosh Blue” decibel meters that mimic the analog version of a McIntosh amplifier, the result of these joined forces creates a sensory experience with tactile sound you can feel—and visual effects you can see.

McIntosh Dashboard App, Night Mode

MX1200

Reference Entertainment System

The MX1200 Entertainment System is standard on the Wagoneer S Series II and Obsidian Launch Edition.

Meticulously engineered and tuned for the Wagoneer S, this new entertainment systems represent McIntosh's world-acclaimed listening experience and bring the brand's audiophile-caliber legendary sound to an electric vehicle for the first time.

The entertainment systems in the 2024 Wagoneer S interior bring the McIntosh home audio experience to life through state-of-the-art sound and thoughtful design. Featuring McIntosh's patented technology—such as Power Guard® to eliminate unpleasant and harmful “clipping” and LD/HP® (Low Distortion/High Performance) technology to deliver pristine sound at any volume—the MX1200 promises the highest quality, listening experience, paired with high-end McIntosh-inspired aesthetics.

The MX1200 also includes illuminated logos on the door speakers, aluminum framing, industrial ridged control knobs, and the iconic “McIntosh Blue” decibel meters on the Uconnect® display screen, which mimic the analog version of a McIntosh amplifier..

A 24-channel amplifier

It intelligently distributes up to 1200-watts to 19 optimally placed speakers, based on the speakers' individual needs.

Four powerful 6" x 9" door speakers

With LD/HP in the front door speakers.

Active and passive coaxial speakers

Featuring lighter, stronger materials that reduce THD (Total Harmonic Distortion), improve performance and create a more anchored, responsive sound stage.

Each coaxial speaker

Has a 3.5" midrange and a 1" tweeter with a dedicated amp channel.

12" dual voice coil subwoofer

One of the highest performing subwoofers in the industry.

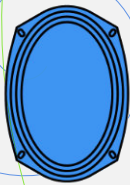

Rear speakers

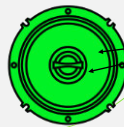

Mounted in the liftgate that play low enough to blend perfectly with the subwoofer.

1200

Legendary Sound at Your Fingertips

Enjoy pure, unadulterated sound on the road, exactly as the artist intended.

For the full McIntosh experience in Jeep vehicles, the McIntosh App offers an immersive acoustic soundstage and integrates the iconic blue meters, emulating the analog versions of their home audio systems in the Jeep Wagoneer S.

The signature blue meters are found only within the infotainment system and the app needs to be activated to enjoy world-class audio for every adventure.

To access the blue meters, press the “Apps” icon on the Wagoneer dashboard touchscreen and open the McIntosh app.

For faster launch, set it as a “Favourite” or dock it at the bottom of the main window.

1 Select the MEDIA tab to start playback

2 Select the APPS tab

3 Select the McIntosh app to launch the app
